# Winterization

What is winterization?

Winterizing is just a couple of steps carried out in order to prepare your home towards the cold winter months. For those who plan to vacate the home for the winter period.

The winter months are often accompanied with pipe bursts. Winterizing your home is inexpensive, and an ideal option rather than replacing a pipe system. The best time to winterize your home is before the winter season finally sets in.

Draining water from a water heater, water softener and/or holding tank and shutting it down.

Opening water faucets to allow water to drain. Blowing air through the water lines and drain pipes to drain the water. Flush all of the toilets to remove all of the water from the bowl and tank.

Putting antifreeze in water lines, drain pipes, and toilets to prevent freezing of water left behind after draining.

Setting furnace to an adequate temperature.

## Mainenance Package

What is all included in the Full Yard and Maintenance Package?

This package includes one spring cleaning visit, one spring weed control application, mowing and trimming as needed, leaf removal, with one fall weed control application, and snow removal greater than 1 inch. Package includes the use of weed killer.

Snow removal starts when snow has stopped falling. If it snows overnight, we will start at 7am. If it snows during the day, we will start as late as 1pm. (It may be a few hours depending on snowfall)

Snow removal consists of snow blowing and shoveling the driveway, main walking paths and steps. Salt is also used as necessary.

## Do you offer one time snow removal/ lawn mowing?

We currently do not offer one-time services other than Spring and Fall clean up.

## How do I cancel my contract?

Our Maintenance Package is Month-To-Month. You may cancel with a 30 day notice by contacting us to avoid any additional fees.

## Disclaimer

All services are billed at the time of service,

except for the **Full Yard & Maintenance** package which is billed one month in arrears.

Mowing will not be completed if yard contains an excessive amount of pet feces.

At times weed killer may be used as needed.

Customer is ongoing until canceled by

Flood Homes Service is not responsible for the following damages during winterization:

1. Floor vinyl cracking under extreme temperature.

2. Breakable items such as: Canned goods, glasses, electronics, etc.

3. Water softeners, ice makers, and faucets. Could dry up and fail, which is not in our control.)

Services will not commence until form is signed and returned to our office.

Flush all of the toilets to remove all of the water from the bowl and tank.

Putting antifreeze in water lines, drain pipes, and toilets to prevent freezing of water left behind after draining.

Setting furnace to an adequate temperature.
